

Securing Data in Mesopotamia

New Technologies for Secured Cuneiform Texts

14 - 18 March 2022, Leiden, the Netherlands

Scientific Organizers

- Caroline Waerzeggers, Leiden University
- Dominique Ngan-Tillard, Delft University of Technology
- Hubert Mara, Martin-Luther-Universität Halle-Wittenberg
- Dirk Roorda, KNAW
- Rients de Boer, Leiden Delft Erasmus Centre for Global Heritage and Development & Faculty of Archaeology

Topics

- Information Technology in Ancient Mesopotamia
- Protection and Dissemination of Information
- Archaeobotanical Research of Clay Tablets
- Finger-Print Analysis of Cuneiform Tablets
- Ink Traces on Cuneiform Tablets
- See-Through Techniques for the Study of Cuneiform Envelopes and Clay Inclusions
- The Archaeology of Cuneiform Archives

The Lorentz Center organizes international workshops for researchers in all scientific disciplines. Its aim is to create an atmosphere that fosters collaborative work, discussions and interactions. For registration see: www.lorentzcenter.nl

This workshop is part of our collaboration with NIAS and aims to stimulate research in the humanities & social sciences.

Clay envelope with cuneiform tablet encased (LB 254), with micro CT scanning the inner tablet is visible as a 3d model without breaking the object. Photo: Dominique Ngan-Tillard & NINO. Owner of the tablet: Netherlands Institute for the Near East. Poster design: SuperNova Studios . NL
